Assignment: Media-Rich Article Page

Week: 3	**Due:** Sunday, Sept 13, 2026 by 11:59pm
Points: 2 points	**Submit:** ZIP file (HTML + images)

Assignment Overview

Build a single-page article that uses images and embedded media well. Same semantic structure as your recipe page, now with photos, captions, and video or audio. Still no CSS, we start styling next week.

What to Build

Write a short article (250 words minimum) on any topic you like: a place, a hobby, an event, a profile, or a review. The writing does not need to be perfect, but it needs enough real content to hold images and media.

Your page must include

- **Semantic structure:** `<header>`, `<main>`, `<article>`, `<footer>`, one `<h1>`, and `<h2>` section headings
- **At least 3 images** stored in an images/ folder, linked with relative paths
- **Descriptive alt text** on every image: "Red brick clock tower at sunset on the TTU campus", not "image1.jpg" or "photo"
- **At least one `<figure>`** with a `<figcaption>` that adds information, not just repeats the alt text
- **One embedded video or audio:** a `<video>` or `<audio>` element with `<controls>`, or a YouTube `<iframe>`
- **Right format and size:** .jpg for photos, .png for logos or transparency, and nothing over ~1500px wide or 500KB
- **Credit your sources** in the `<footer>`: photos, media, and any facts you used

What to Submit

A ZIP file named **`LastName_Article.zip`** (example: Kraishan_Article.zip)

It must contain:

- `index.html` (your article page)

- `images/` folder with all your image and media files

Unzip it somewhere else and open index.html before you submit. If an image is broken there, it is broken for me too.

Grading (2 points)

Criteria	Points	What I'm Looking For
Images, Formats & Paths	**0.6**	Three or more images, sensible formats and sizes, in an images folder, with relative paths that work from the ZIP.
Figure & Caption	**0.4**	At least one `<figure>` with a `<figcaption>` that genuinely adds context to the image.
Embedded Media	**0.5**	A working `<video>`, `<audio>`, or `<iframe>` embed with controls that plays in the browser.
Alt Text & Semantics	**0.5**	Descriptive alt text on every image, correct semantic structure, one h1 with proper h2 sections, clean indentation.

Tips & Common Mistakes

- Broken paths are the #1 point loss here. Use images/photo.jpg, never C:/Users/...
- Without the `<controls>` attribute your video has no play button.
- Compress big photos first (squoosh.app is free), and only use media you may legally use.
